

```

/* Places one dimension of a 3-D matrix into a vector using a syntax similar
 * to IDL of m[* ,d2,d3], etc.
 *
 * @param start How far along the dimension to iterate
 * @param m The matrix
 * @param d1 First dimension parameter
 * @param d2 Second dimension parameter
 * @param d3 Third dimension parameter
 * @return Vector of all values in the specified dimension
 */

```

```
public static double[] get1Dimension(int[] start, double[][][] m, String d1, String d2, String d3)
```
